

READ DIRECTIONS FOR USE BEFORE APPLICATION

DRI-GON

PREMIUM SOIL WETTING AGENT

ACTIVE CONSTITUENT : 100% Specialty non-ionic surfactants

- Improves water penetration
- Overcomes water repellency and helps prevent dry patch in turf and lawns

SPECIALLY DESIGNED FOR USE WITH LARGE VOLUMES OF
WATER SUCH AS BY DIRECT INJECTION IRRIGATION

20 Litres

DIRECTIONS FOR USE

Situation	Rate	Critical Comments
Turf		
Direct Injection Irrigation	2.5 - 5 L/Ha	Weekly or fortnightly application in irrigation water at dilution will provide excellent turf vigour and prevention from dry patch.
All situations low		
Boom Spray		
Golf Greens & Tees	2 L/400 sq. Mtr	Apply in early cool hours of the day and water in well. Dri-gon is usually applied at 0.25% - 0.5% dilution in water. i.e. 25L/Ha in 5000 - 10000 L/Ha.
Fairways	5 - 25 L/H	
Note! Application to turf at concentrations greater than 1L/100L risk phytotoxicity if not watered in immediately. Early application of Dri-gon in mid spring with a follow up treatment in mid summer will usually provide good protection from dry patch and water repellency. Spot treatments with a hand gun can be used to treat problem spots if they occur.		
Horticulture		
Hand / boom spray	2.5 - 5L/1000L	Applying Dri-gon monthly to water repellent soils around the base of the plant or tree to achieve good coverage
Drip feed irrigation	0.25 - 0.5L/1000L	Application required 1 week in every 4 weeks.

NOT TO BE USED FOR ANY PURPOSE OTHER THAN INDICATED ON THIS LABEL UNLESS AUTHORISED UNDER APPROPRIATE LEGISLATION.

GENERAL INSTRUCTIONS

Dri-gon is a special purpose nonionic surfactant suitable for use in most situations where water repellency inhibits or prevents the growth of turf, gardens and horticultural crops. If left untreated poor water penetration leads to weak growth, poor nutrient uptake and low crop yields or death of sensitive plants and turf. Dri-gon provides rapid penetration of water to highly water repellent soils and continues to achieve deep penetration even as it dilutes while watering in. Dri-gon is very long lasting and in some situations will continue to function for up to 12 months. Use with herbicides and fertilizers in turf is not recommended as it may increase the phytotoxicity of those chemicals to sensitive varieties. It is a wise precaution to test all mixtures before committing to large scale use.

MIXING

Dri-gon mixes easily with water and should be added directly to the spray tank after the loading of water. Gentle mixing will minimise foam generation.

PROTECTION OF WILDLIFE, FISH, CRUSTACEA AND THE ENVIRONMENT

DO NOT contaminate streams, rivers or waterways with the chemicals or used container.

Batch No:

Date of

Manufacture

STORAGE AND DISPOSAL

Store in closed, original container in a well ventilated area, as cool as possible. Triple rinse empty containers and add rinsings to tank. Destroy empty containers by crushing or puncturing them. Bury containers at an approved landfill or bury under at least 500mm of soil at an authorised disposal site.

SAFETY DIRECTIONS

Avoid contact with skin or eyes. Wear rubber gloves, overalls and goggles or face shield.

FIRST AID

If poisoning occurs induce vomiting and contact a doctor or Poisons Information Centre. If skin contact occurs remove contaminated clothing and wash skin thoroughly. If in eyes, hold eyes open and flood with water for at least 15 minutes and see a doctor.

CONDITIONS OF SALE

The use of Dri-gon being beyond the control of the manufacturer, no warranty expressed or implied is given by SST Products PTY. LTD. regarding its suitability, fitness or efficiency for any purpose for which it is used by the buyer, whether in accordance with the directions or not and SST Products PTY. LTD. accepts no responsibility for any consequences whatsoever resulting from the use of this product.
