

TRIBUTE

For use with post emergent herbicides to enhance their performance.

PARAFFINIC OIL

- Mineral spraying oil to improve the spreading and wetting of herbicides
- The high paraffin content of Tribute® enhances the penetration quality
- High paraffinic oils cause less crop damage compared to many generic oils

DRIFT REDUCTION

- Less driftable droplets produced
- More chemical on the target, giving greater optimal results by increasing droplet deposition

NO AROMATIC SOLVENTS

- SST has replaced the harsh aromatic solvent found in most comparable products while maintaining a superior biodegradable surfactant not used in other oil concentrate formulations
- Environmentally friendly
- Supported by many chemical companies for use with products such as Haloxyfop and many selective herbicides

PACK SIZE

- 5L / 20L / 110L / 1000L
